

SARE: Advancing the Frontier of Sustainable Agriculture in...

Mississippi

Project Highlight: *Advancing Opportunities for Women Farmers*

Women farmers accounted for 30 percent of farmers nationwide in 2012, according to the Census of Agriculture, and 14 percent of them were principal operators. But while those numbers are encouraging, support and outreach is needed to increase those numbers and to sustain the women already involved in agriculture.

That is why organizations like Annie's Project, a national risk-management education program for women launched in 2003, is so needed. Its 2012 SARE grant allowed the program to expand its reach by conducting two training events in Mississippi where Extension educators from across the South gathered to learn how to conduct Annie's Project workshops. A typical

Annie's Project workshop brings in guest speakers from local agricultural businesses to discuss topics such as finances, human resources and marketing with local women farmers. The SARE-funded trainings drew 63 Extension educators from 12 universities—including three historically black universities—and many went on to conduct workshops in their communities. In Mississippi alone, more than 16 educators went on to hold local Annie's Project workshops.

For more information on this project, see www.sare.org/projects, and search for project number ES12-113.

SARE's four regional programs and outreach office work to advance sustainable innovations to the whole of American agriculture.

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$273 million to more than 6,800 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

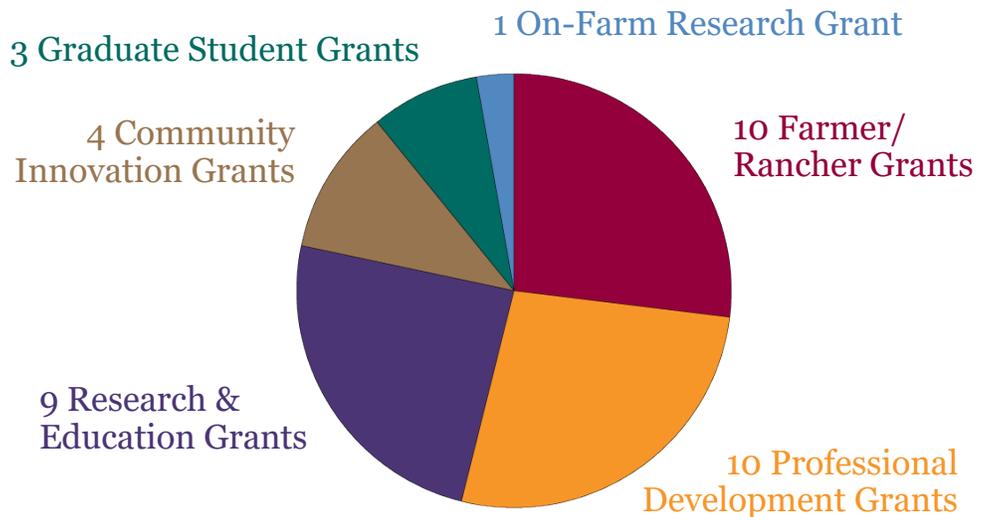

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining the SARE Learning Center—a library of practical publications, grantee-produced information products and other educational materials.

SARE Grants in Mississippi

SARE has awarded a total of **37 grants** in Mississippi since 1988

SARE's Impact

53 percent of producers report using a new production technique after reading a SARE publication.

79 percent of producers said they improved soil quality through their SARE project.

64 percent of producers said their SARE project helped them achieve higher sales.

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit www.southernsare.org/mississippi to learn more.
