Planting Into Cereal Rye

Planted June 6 taken June 24

What Makes It Work

- Actively growing
- Warm conditions forecasted
- 4 hours sun after application
- Citric acid for lower water pH
- 10 -12 gal water
- Good penetration
- Fine mist not AI nozzles AIXR works good for US
- PH down to 5.0
-
- Soil quality. What we have.
- Soil Health. What we do with it.
- Vital living system.
